

# ONE STEP POLISH

Premium polishing paste medium

- ✓ **Protective against weather influences**
- ✓ **Very easy to use**
- ✓ **Gives a nice deep shine**
- ✓ **Also suitable for chrome**

## PRODUCT DESCRIPTION:

**ONE STEP POLISH** is a very effective polish for as good as new OEM and refinish paints. Removes marks from P4000, and polishing is possible without holograms and micro-scratches. One Step Polish is a special combination of materials with high quality. By using high-performance minerals, there is obtained a high lustre without holograms and micro-scratches with One Step Polish. One Step Polish is suitable for all paints, especially scratch-resistant coating systems.

## APPLICATIONS:

For all modern types of paint. Particularly suitable for coatings with a slight oxidation and difficult and delicate colours (dark blue, burgundy, black, etc.) Also suitable for chromium and painted plastics. One Step Polish is also suitable for scratch-resistant coatings.

## INSTRUCTIONS:

Before use, read and follow label instructions. Do not process One Step Polish in the burning sun. Clean the surface to be treated with water or possibly with shampoo. One Step Polish can be used by hand or with the polishing machine. Put One Step Polish on a clean, soft cloth and rub in a circular motion. Try to avoid contact with unpainted plastic. If there is still contact with unpainted plastic parts, immediately wash it with a sponge and plenty of water.
