

# UNI GREASE

LUBRICATION AND MAINTENANCE

- **(Salt) water and steam resistant**
- **Wear resistant**
- **Reduces pitting and Stick-slip**
- **Excellent corrosion resistance**

## PRODUCT DESCRIPTION :

Propart Uni Grease is a high quality, multi-purpose grease, added with concentrated dispersion solid (ceramic) and Teflon lubrication substances to strengthen the EP and AW features.

This addition also protects the system from bumping loads.

## APPLICATIONS :

Applicable wherever a permanent lubrication should be obtained with strong anti-seizure and high pressure features in almost any environment, even at high peripheral speeds, in both open and closed systems.

Think of:

- Bearings, plain bearings, ball bearings
- Drive systems, in humid environments
- All kinds of guides
- Cables
- Rods
- Chains and such
- Systems with shock loads, is very suitable for automatic lubrication systems.

## INSTRUCTIONS :

Apply the grease at the lubricated place. Preferably the surface must be clean and dry. Do not mix with other greases.

**SPECIFICATIONS :**

<b>Colour:</b>	Beige to white
<b>Components:</b>	lithium complex soap, mineral oil, additives, Solid lubricants
<b>Density:</b>	ca. 0,9 kg/l
<b>NLGI-Class:</b>	2
<b>Thermal stability:</b>	good
<b>Global temperature operating range:</b>	-30°C to +160°C
