

# AIR POWER

SOLVENTS AND DEGREASERS

- Simplifies assembly and disassembly
- Unique high-pressure system in aerosol
- Completely dry and leaves no film or residue
- Also for sensitive surfaces

## PRODUCT DESCRIPTION:

**AIR POWER** is a high-pressure system from 6 bar, which brings an enormous air pressure with the aid of the straw extension, also for difficult to reach places. Air power contains no moisture and oxygen and is therefore appropriate for dusting or drying of electrical and electronic appliances. By turning the Air Power upside down, it can be used as a freezing spray.

## APPLICATIONS:

Simplifies assembly and disassembly by huge cold shrinkage of pins, bolts, nuts, nipples, injectors and glow plugs. Safe dusting, clean and blow dry of printed circuit boards, photographs, equipment, sensitive surfaces, paints and plastics. Ideal for testing of: temperature sensors, bi-metal, circuit boards, sensors, temperature controllers and rheostats by cooling effect control. Removing dust in electronic devices and electrical contacts. Cleaning computer and other keyboards. Cleaning of printed circuit boards and control resistors. Cleaning lenses in cameras and projectors. Remove paper debris and powder ink in photocopiers and printers. Shrinkage of small metal parts for assembly. Removing dust particles from smoke detectors and air fresheners.

## INSTRUCTIONS:

Shake before use. Use the aerosol in straight shape to move at high power air. Turn the aerosol on its head in order to use a powerful freezing spray.

**SPECIFICATIONS:**

**Physical and Chemical Properties**

**Flammable!**

<b>Base:</b>	Propane/ Butane
<b>Pressure at 20 °C:</b>	6 bar
<b>VOC-content:</b>	100 % w/ w
<b>Smell:</b>	Characteristic
<b>Cooling:</b>	Up to - 60 °C (turn aerosol)
<b>Shelf life:</b>	12 months, dry, cool and frost-free
<b>Safety measures:</b>	Please consult the safety datasheet
