

STRIPPER SPRAY

SOLVENTS AND DEGREASERS

- Easy to apply
- User friendly
- Very effective
- Gel-structure

PRODUCT DESCRIPTION :

Stripper spray is a fast and efficient stripper that avoids scour, brush and scrape, and can be used safely on every kind of metal, wood, plaster, stone and glass.

By its effective composition Stripper spray removes paint, varnish, glue, tar, carbon deposits, packings. Because Stripper spray does not drip it can be applied economically on vertical surfaces.

APPLICATIONS :

Removal of:

Car paint, undercoating, stickers on bumpers and windows, old sealings on all kind of metals, hardened oils and carbon deposits on valve seats, cylinders and other engine parts.

Stripping:

Paint, varnish, resins, bitumen, pitch, plastic and graffiti on walls, windows, panels, woodwork, boats, road signs, road construction equipment.

INSTRUCTIONS :

Shake before use.

Spray the parts from a distance of about 25 cm. Let soak for 5 to 10 minutes and after then remove the remnants with the spatula.

If necessary repeat the action until the complete material is removed.

SPECIFICATIONS :

Content:	400 ml
VOS-content:	about 98% w/w
Colour:	Transparent
Odour:	Characteristic
Density at 20°C:	1,25 gr/ml
Spray yield:	1,5 gr/sec
Vapour pressure at 20°C:	3 to 4 bar
Efficiency:	about 0,8 m ²
