

FRUITY ECO

CLEANING AND MAINTENANCE PRODUCTS

- Thorough but gentle cleaning
- Contains grain structure made from olive seed powder
- Adjusted to the natural pH value of the human skin
- Bio-degradable

PRODUCT DESCRIPTION:

FRUITY ECO is especially suitable for the removal of medium and heavy dirt e.g. from grease, oil, metallic dust, graphite or soot, which cannot be removed with a hand cleanser not containing abrasive agents. The cleansing effect of the product is supported by natural, bio-degradable olive seed powder, which in its grain structure and grain fineness is especially adapted to this use. Because of its low specific weight, blockages of drains and pipes are not to be expected. The rape seed oil contained supports the cleansing power of the product and helps to prevent skin irritation due to its lipid-balancing effect. The pH-value of the product has been adapted to the natural acid mantle of the human skin, which in its functions is not affected by the product. Protect the Fruity Eco from freezing!!

APPLICATIONS:

Use Fruity Eco when washing your hands. Wet your hands and then use the Fruity Eco to get your hands free of contamination.

Rinse and dry your hands thoroughly afterwards.

INSTRUCTIONS:

Place the Fruity Eco in the appropriate dispenser. After this you can immediately wash/ care for your hands with the Fruity Eco.

SPECIFICATIONS:

Fruity Eco complies with the EU Cosmetics Regulation 1223/2009 of the European Commission and is also specially developed, produced and distributed according to these guidelines. For the products covered by this regulation, no safety data sheets are required, but only for products that are subject to the chemicals law.

Composition according to INCI**Nr. INCI Designations**
