

UN-DO SYSTEM (UNIQUE DOSING)

CLEANING AND MAINTENANCE PRODUCTS

- Easy to assemble & operate
- Cost reduction through perfect dosing
- No direct contact with clothing or skin
- Prevents errors / damage due to incorrect dosing
- No electricity required
- Connection options for no less than 4 cleaners from ProPart International
- System is fully maintained by ProPart International

PRODUCT DESCRIPTION:

UN-DO System is a problem-solving system in which ProPart simplifies the dosing of various concentrated cleaning products for the end user. Un-do System has been developed to make a ready-made cleaning product for the end user. All cleaners of ProPart must be diluted with water, through a special injection process the Un-do system is able to dilute all cleaners with water in the pre-set dosage. The system consists of only one control box with one connection for water supply and 4 connections for concentrated cleaning products from Pro Part. Each cleaner can be set separately in the desired dosage. The system has been specially developed to work on pressure and flow of the water, so that electricity or a pump mechanism is unnecessary.

APPLICATIONS:

Un-do System is the ultimate cost-saving solution for:

- Washing places
- Car washes
- Cleaning companies
- Workplaces
- Technical and facility service

INSTRUCTIONS :

With the push of a button you can fill your pump nozzle or bucket with the desired product and you can get started right away.

A ProPart International employee can install this system for you and provide you and your employees with instructions.
