

POWER BOND MIXERTIPS 400ML

TOOLS AND PARTS

- 1:1 and 2:1 adhesive dosage
- Optimal mixing
- Extends the life of the cartridge

PRODUCT DESCRIPTION:

POWERBOND MIXER TIPS (MFQ 08-24) for 400 ml two-component cartridges. Made with green elements.

This mixer tip allows 1:1 and 2:1 glue dosing. The mixer provides optimal mixing in a smaller footprint than traditional mixers, allowing users to work more closely with the materials they bond. The real value of this mixer tip is the way it connects to the cartridge via two separate outlets, which ensures that there is no product contamination prior to dispensing. This reduces clogging and extends cartridge life.

APPLICATIONS:

Applicable to article number 7045/ Power Bond

SPECIFICATIONS:

Features:	Stepped tip
Number of items:	24
Ø Inside:	8,7 mm
Ø Outside:	11,5 mm
Ø Output:	3,2 mm
Length:	155 mm
Content:	8,69 ml
